Moshon Data Vehicle Target

Low cost version of the Euro NCAP EVT

Moshon Data Vehicle Target

The Moshon Data Vehicle Target is an inflatable, lower cost version of the official Euro NCAP Vehicle Target (EVT). It is designed to the same specifications as the Euro NCAP target and intended for development work. Being a cheaper substitute for the Euro NCAP target means vehicle manufacturers and test facilities can purchase multiple vehicle targets and increase the number of tests.

Lower cost - same specifications

The lower cost Vehicle Target has the same specifications as the official Euro NCAP Vehicle Target and uses a digitally printed exterior cover ECE104 Standard LIDAR reflective material and Energy Shield Radar reflective material.

- ✓ AEB City
- ✓ AEB Inter-Urban
- ✓ FCW
